## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 2-11, 13-15 and 17-18 allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest an image signal processor comprising: a deficiency candidate detection circuit computes a difference between a maximum level and a minimum level of the signals of the plurality of peripheral pixels, producing a first threshold value by adding the difference to an average level of the signals of the plurality of peripheral pixels and producing a second threshold value by subtracting the difference from the average level; a deficiency determining circuit connected to the deficiency candidate detection circuit, for determining a deficient pixel according to continuity of the deficient pixel candidate based on a plurality of comparison results over the plurality of screens; a position memory circuit, connected to the deficiency determining circuit, for storing deficiency information of a position of the deficient pixel determined by the deficiency determine circuit; and used in combination with all of the other limitations of the claim 2.

Similarly, neither the prior art teaches or suggests a method of detecting a deficient pixel in a plurality of pixels associated with each of a plurality of screens, comprising: detecting a detecting a deficient pixel candidate by computing an average level from the signals of the plurality of peripheral pixels adjacent to the target pixel; detecting a maximum level and a minimum level from the signals of the plurality of peripheral pixels; computing a difference between the maximum level and the minimum level; and setting a threshold value by adding

the difference to the average level or subtracting the difference from the average level; repeating a predetermined number of times over the plurality of screens to compare a signal of a target pixel in one of the plurality of screens with the threshold value set; and used in combination with all of the other limitations of the claims 13 and 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
